GETMobile

✨What Makes GETMobile Different?

GETMobile is more than a delivery tracking app — it's a strategic tool built specifically for transport companies that need to scale delivery operations efficiently, affordably, and intelligently.

- **Built for Scalability**: Whether you're managing 100 or 10,000 deliveries a day, GETMobile grows with your business.
- **Seamless Integration**: Works with GETOnline and leading transport management systems.
- **Smartphone-Based**: No need for bulky hardware scanners. All you need is a mobile device.
- **Driver-First Design**: Simple interface built for quick task management, even on the move.

🌿Sustainability by Smart Design

GETMobile actively supports your green goals while saving you money.

- **Reduced Carbon Footprint**: Route optimisation cuts mileage and emissions.
- **Less Fuel Waste**: Avoid unnecessary trips and detours through smart delivery grouping.
- **Lower Failed Attempts**: Real-time SMS alerts and messaging options mean recipients are ready to receive their delivery the first time.
- **Fewer Devices Needed**: Smartphone-only setup reduces hardware waste and energy use.

🌍 Designed for the Delivery Businesses of Tomorrow

GETMobile gives logistics teams the tools to:
- Deliver faster and smarter
- Meet sustainability benchmarks
- Improve ROI with measurable metrics

34% increased delivery efficiency	**18%** improved first-attempt deliveries

*Estimation based on clients' report
